List of antigen tests authorized for entry to France from UK

Only the following categories of people will be authorized to travel in France or enter from the UK:

- French people and nationals of the European area, their spouse and children;
- British or third-country nationals who either normally live in France, the European Union or the European area, or must make essential journeys as [listed in the annex](#).

Travel by the categories of people concerned will automatically be subject to the requirement to have, prior to departure, the **result of a negative test taken in the UK less than 72 hours earlier**. Children aged 11 and over must take the test.

In the absence of PCR tests, antigen tests sensitive to the VUI-2020-12-01 test will be authorized; see the list of these below.
